EXPERIENCE [Facebook](#), London, United Kingdom
Software Engineer 10/2020 - Present
Software Engineering Intern 06/2019 - 08/2019
 Worked on the DELF paper [2] by mainly focusing on the performance evaluation. Implemented optimizations as a result of the visibility that this evaluation provided.
Language: Hack, SQL, Python

[IBM](#), Zurich, Switzerland
Research Intern 06/2018 - 09/2018
 Formally derived and implemented a differentially private optimization algorithm for generalized linear models, as part of the core algorithmic component of [SnapML](#). The work continued at EPFL and led to [3].
Language: Python

[Technicolor](#), Rennes, France
Research Intern 06/2017 - 08/2017
 Designed and implemented a method to boost the evaluation of a new recommendation service by exploiting the output of a supposedly well-established online recommender, acting as a black-box that the new service can query. Patent filed with number PCT/EP19/052345. The work continued at EPFL and led to [4].
Language: Python

[Athens Clue](#), Athens, Greece
Web Developer 12/2014
 Designed and implemented a web application for an escape room.
Language: JavaScript, HTML, CSS

High School Students, Athens, Greece
Tutor 03/2012 - 06/2015
 Provided complementary mathematics, physics, and programming lectures to 8 students who either needed additional help or wanted to go beyond their school curriculum and perfect their skills.
